

# CROCUS POTATO AERATOR

## Cooling and aerating potatoes

The Crocus potato aerator is especially designed for aerating potatoes and other tubers.

The aerator may be used in both indoor and outdoor stores where it can suck or blow air through the stored potatoes.

Aerates up to 165 tons potatoes at 80m<sup>3</sup>/tons / hour.

## Technical data:

Ventilator fan: 3 kW axial ventilator fan  
Dia. 500 x 450, 2800 revs./ min.  
Output: 13.400 m<sup>3</sup>/hour  
with 30 mm. water column.

Cone: Dia. 500 /900 with dia. 500 mm.  
flange  
The cone and ventilator fan are  
bolted together.
